BENEFITS

RECOVERY
Regular massage helps to prepare for, and recover from, strenuous workouts by increasing oxygen-rich blood to tired and sore muscles. This helps improve physical mobility and minimize recovery time.

RESTORATION
Modern life can cause stress injuries, such as tension headaches from excessive screen time or back pain from constant poor posture. Daily massage helps correct these habitual strains in order to improve your overall health.

REJUVENATION
Massage helps improve mental clarity and reduce anxiety. Even just 15 minutes can contribute to better sleep, improved mental focus, and a greater sense of well-being.

REHABILITATION
Massage can help the body recover from a variety of physical conditions, including back pain, Sciatica, Arthritis, Fibromyalgia, and much more.

“I've had the massage chair for a week and my chronic lower back pain vanishes after sitting in the chair. The combination of heat, zero gravity and "L -Track" technology that massages your glutes as well as lower back is pure heaven...I can't say enough about the chair!
— Mario
