

CHAIRS FOR CHARITY

For every Human Touch product purchased, a contribution will be made to help someone receive their own wellness solution.

CHAIRS FOR CHARITY STORIES

Los Angeles County Fire Department, North Hollywood

The Human Touch® Chairs for Charity program serves as a way for Human Touch to give back to the community through the donation of their state-of-the-art massage chairs and Perfect Chair® recliners. This exciting new program places an emphasis on those who work to serve their respective communities as first responders, family enrichment and childcare services, public safety sectors, and individuals who face daily challenges due to back pain or other health issues.

In September 2019, Human Touch was able to donate a Novo Massage Chair to a Los Angeles County Fire Department in North Hollywood, California. The men at this fire station work hard to serve their community, have been so grateful for their Novo as a way to relax and recover from the tolls it takes on their bodies.

Since receiving our massage chair, we have nothing but the highest reviews. Everyone can't wait for their turn and it has helped tremendously with a variety of injuries and pain - Steve A., Firefighter for Los Angeles County Fire Dept.

"As a Los Angeles City Firefighter, my experience has been amazing with the Human Touch Novo massaging chair," said Steve A., Firefighter for Los Angeles County Fire Dept. "This chair is an instrumental addition for my crew and myself. We are assigned at one of the busiest fire stations in the city of Los Angeles, and every member at our station has had different needs that this chair has met. A few of the many modes we prefer are; relax, energize, and recovery.

This chair also offers many variations of massages as well; Thai, Sports, Swedish, and Shiatsu. Depending on what your body needs, you can also select deep tissue, soft tissue, lower back, upper back, etc... The chair also has Bluetooth. It will correlate the massage with the music of your choice. Since receiving our massage chair, we have nothing but the highest reviews. Everyone can't wait for their turn, we need a sign up sheet... It has helped tremendously with a variety of injuries and pain. We also cant wait just to relax. We all love it!"

Many firefighters suffer from back problems, sore muscles, and bad joints, due to the heavy weight of their gear while out on calls, and the fatigue that comes with long hours spent on duty. In order to maintain physical performance in their careers, they require routine preventative and corrective care, including monthly chiropractic and massage therapy visits, as well as more intensive treatments like regular orthopedic epidurals.
